

Title	Landsat foliage projective cover (FPC) time series summary products (25m) 1988-2008
Abstract	Landsat foliage projective cover (FPC) time series summary products are the result of statistical analysis of a time series stack of individual date FPC images. The products available are based on analysis of the 1988-2008 period and include variables such as slope, intercept, standard deviation and standard error, as images. These products are created as an interim stage in the development of the woody extent and FPC product.

Edition	2016
Dataset URI	https://www.planningportal.nsw.gov.au/opendata/dataset/9d1b6ee9-5445-4f89-9f2c-cc3c359fd6ea
Purpose	To support the NSW Annual Report on Native Vegetation which is OEH's comprehensive summary of actions undertaken by private and public land managers to conserve and manage native vegetation. The annual report, which is produced at the end of each calendar year, comprises the Native Vegetation Report Card, the Woody Vegetation Change Report and the Compliance and Enforcement Report Card.
Status	Completed
Spatial representation type	grid
Spatial reference system	
Code identifying the spatial reference system	4283
Spatial resolution	25 m
Additional	

information source	Scene images Stage Codes are ,chm> and ,chn>;Detailed description of the products are covered in "Description of Remote Sensing Based Foliage Projective Cover and Woody Extent Products" report (Tim Danaher, OEH, 30 June 2011).
